

SiS AM500

A solution of a Silicone Quaternary Ammonium Salt with 5% active ingredient, SiS AM500 is an antimicrobial agent that inhibits the growth of odor causing bacteria, mold, and mildew. Provides a durable microbiostatic coating and can be integrated into the substrate during the manufacturing process or applied topically.

EPA Registration Number

75174-2

Ingredients

3-(trihydroxysilyl) propyldimethyloctadecyl ammonium chloride	5%
Inactive ingredients	95%
Total	100%

Summary of Benefits

- Provides an invisible, long lasting microbiostatic coating to protect surfaces. Reapplied every 90 days.
- Effective against bacteria that causes odor, staining and discoloration.
- Inhibits the growth of mold, mildew, and algae.
- Odor protector and inhibitor.
- Used on both porous and non-porous surfaces.
- Made in the USA.

Coverage Area

Refer to the Technical Data Sheet for more information.

Sample Applications (partial list)

Air filters / Auto Care / Bedding / Carpets / Clothing / Countertops / Concrete / Footwear / Paint / Plastics / Metals / Roofing Materials / Upholstery / Walls

Directions for Use

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

SiS AM500 needs to be diluted in water or another solvent prior to use at a ratio of 1:7.

For specific directions on different applications, please refer to the EPA Master Label.
